SAFETY
- Wear your PPE (Personal Protective Equipment) at all times. You must wear the proper safety gear listed below (Personal Protective Equipment), and safety glasses at all times and maintain this gear.

- Before starting work, review all safety procedures and ensure that all equipment is in proper working order.

- Keep your work area clean and tidy. Maintenance of the work area is essential to ensuring the safety of everyone working in the area.

- Maintain proper lighting. Ensure that you have good lighting in your work area to prevent accidents from occurring.

- Avoid distractions. Make sure that you are not kostenlos (or distracted) while working. If you are, you may make mistakes that could lead to accidents.

- Keep your tools sharp. A sharp tool is safer than a dull tool. This will help to prevent accidents from occurring.

- Keep your equipment in good condition. Regular maintenance checks are essential to the safety of your equipment.
